## Current role

Frontend development Tutor at Digital Skilling and Empowerment Program (DSEP) and Frontend developer at Soft6060

## Experience

Education, Fintech, Cryptocurrency, Blockchain, Web 3.0

## Technologies

CSS, HTML, JavaScript, React, TypeScript, Next.js, REST API, Bootstrap, Firebase, Git, Solidity

## Right now I'm learning...

More about 3d in frontend development with Spline, I love to create interactive UI components and visually stunning animations and designs on web pages

## Work experience

### Frontend development Tutor, Digital Skilling and Empowerment Program (DSEP) 🏢

Sep 2023 – Present (4m)

DSEP empowers aspiring developers with web development mento  
Education

CSS HTML JavaScript

- – Frontend Development Tutor at DSEP, guiding aspiring developers in mastering web development fundamentals such as HTML, CSS, and JavaScript.
- – Focused role on teaching beginners, providing mentorship to nurture their potential, and cultivating a passion for creating web applications and sites.
- – Privileged to contribute to the development journey of learners, fostering a strong foundation in web development through mentorship and guidance.

### Frontend developer, Soft6060 🏢

Jun 2023 – Present (7m)

Team Soft 6060 creates innovative SaaS solutions for diverse

React CSS TypeScript Next.js REST API

- – Frontend Developer at Team Soft 6060, specializing in cutting-edge SaaS software solutions.
- – Collaborated with a diverse team of Frontend and Backend Developers, AI Engineers, Data Analysts, and UI/UX Designers.
- – Experience includes dynamic work in a confidential environment under a non-disclosure agreement.

### Blockchain developer & Frontend developer, OffrCloud 🏢

Jan 2023 – Jul 2023 (6m)

OffrCloud delivers secure, customizable token offerings with  
Fintech · Cryptocurrency · Blockchain · Web 3.0

React CSS Bootstrap Firebase Git Solidity

- – Spearheaded the development of a state-of-the-art FinTech DApp System at OffrCloud, working independently as a Lone Remote Blockchain Developer.

- - Developed a captivating Landing Page to showcase the innovation, demonstrating a blend of coding skills and graphic design expertise.
- - Designed and secured an ERC20 Security Dividend Token, managed token sales, and deployed a transparent dividend distribution smart contract, enhancing blockchain knowledge and emphasizing the importance of secure financial systems.

## Education

### Imo state university

Sep 2019 – Jun 2023 (3y 9m)

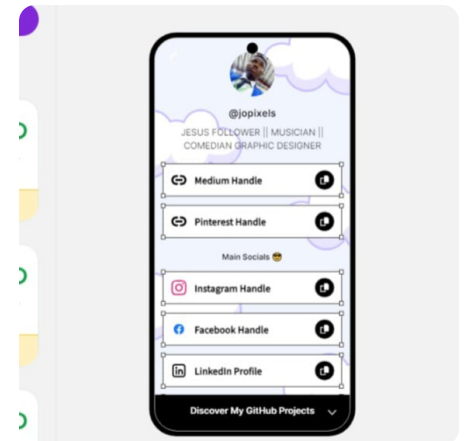

Bachelor's degree Computer science

- Pursued a Bachelor's degree in Computer Science at Imo State University.
- Active participant in the Economics Society committee, contributing to various initiatives.
- Engaged in multiple sports teams, showcasing teamwork and sportsmanship.
- Recognized with the academic prize for outstanding performance during the course.

## Snippets

### Linktree Clone @ [linktree-fabiconcept.vercel.app](https://linktree-fabiconcept.vercel.app)

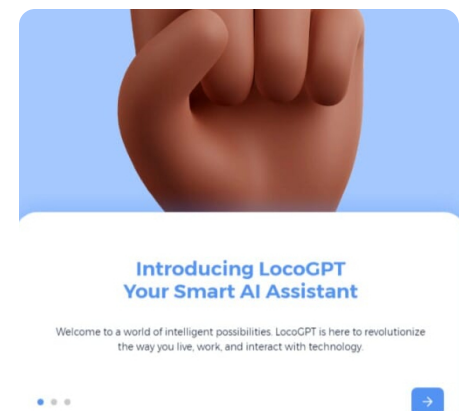

- Developed Linktree Clone with Next.js, Tailwind CSS, and React Beautiful DnD.
- Implemented secure authentication, intuitive admin dashboard, and dynamic user links page.
- Utilized technologies like js-cookie, qrcode.react, React Hot Toast, and react-share.
- Enhanced visuals with creative elements including confetti backgrounds.

### Loco GPT @ [locogpt.vercel.app](https://locogpt.vercel.app)

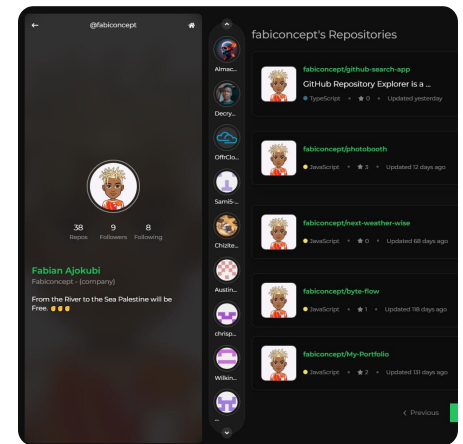

LocoGPT is an innovative clone of the ChatGPT powered by the GPT-3.5 Turbo API. I built this chatbot to engage in dynamic and meaningful conversations, offering a unique user experience.

The tech stack behind the LocoGPT includes React for the frontend, ensuring a responsive and interactive interface. The powerful language processing capabilities are provided by the GPT-3.5 Turbo API, allowing the chatbot to generate human-like responses.

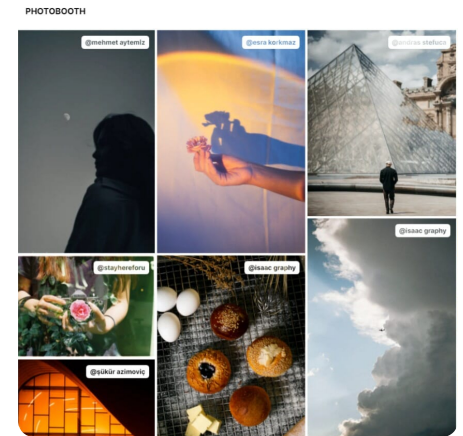

## GitHub Explorer @ [github-search-app-chi.vercel.app](https://github-search-app-chi.vercel.app)

GitHub Repository Explorer is a web application developed with TypeScript and Next.js, allowing users to search for GitHub repositories, view details, and explore repositories based on various criteria. This project provides a modern and dynamic user interface.

## Photobooth @ [photobooth-alpha.vercel.app](https://photobooth-alpha.vercel.app)

Photobooth is a web app for exploring photos. Infinite scroll galleries from pixel.com API on the homepage, and a search page with a logo and search bar. Clone, install, update API key, and start the server to use.

## More about me

### My favourite technology is...

Next.js because of it's super helpful SSG and SSR pages, and their API and page routing is (chef's kiss)

### Right now I'm learning...

More about 3d in frontend development with Spline, I love to create interactive UI components and visually stunning animations and designs on web pages

### Languages spoken

Hausa, Igbo

### The coolest side project I've built is...

The Linktree Clone, it showed more insight on system design and system design planning

### Interests

Open Source Contribution | Language Learning | Continuous Learning | Hackathons and Coding Challenges | User Experience (UX) Design | Mentoring or Tutoring | Industry Conferences/Meetups.
