EDUCATION

Imo State University   Owerri, Nigeria
Bachelor of Science in Computer Science   *Sep 2019 to Jun 2023*
  − Graduated with academic excellence award and active participation in hackathons and developer communities

EXPERIENCE

Software Developer   2025 to Present
Imo Digital City Limited (IDCL) in partnership with Ministry of Digital Economy, Imo State   *Nigeria*
  − Led the development of 35 government websites to digitize operations across Imo State ministries
  − Built and deployed information portals improving public access to ministry services and data
  − Digitized student onboarding and WAEC registration workflows for state secondary schools
  − Developed systems for contractor registration and government contract awards
  − Worked directly with government stakeholders to translate policy and processes into functional digital platforms

Backend Developer   2023
Cold Hubs Limited   *Nigeria*
  − Built scalable Laravel APIs powering cold storage logistics, inventory management, and warehouse operations
  − Designed MySQL schemas and optimized queries supporting thousands of daily records
  − Implemented authentication, role based access, and data pipelines for field and admin systems

Software Developer   2022
Supervision Co.   *Remote*
  − Built internal tools using AppSheet and Google Apps Script to automate workflows
  − Reduced manual processing and improved reporting accuracy

Blockchain Developer   2020
OffrCloud   *Remote*
  − Built and deployed a Web3 FinTech application with wallet authentication and smart contract integration
  − Developed Solidity contracts for token handling, transactions, and platform rewards
  − Created React interfaces connected to blockchain networks and REST APIs

PROJECTS

@useverse NPM Package | React, TypeScript, npm
  − Published comprehensive React hooks library for sound effects, keyboard shortcuts, and file downloads
  − Built with TypeScript, fully typed, lightweight and tree-shakeable for optimal bundle size

Secret Room | Next.js, Socket.IO, Node.js, MongoDB
  − Built real-time anonymous chat application with temporary self-destructing servers
  − Implemented WebSocket communication, encrypted messaging, and secure backend with Express

ClimeCache Weather App | Next.js, TypeScript, OpenWeatherMap API
  − Developed smart weather dashboard with 1-hour caching system to reduce API overhead
  − Implemented city notes feature, favorites management, and keyboard shortcuts for power users

Cold Connect Mobile App | React Native, Expo, Laravel, MySQL
  − Built mobile app for cold storage booking and refrigerated truck logistics across Nigeria
  − Integrated secure payment processing, real-time tracking, and push notifications

TECHNICAL SKILLS

Languages: Rust*, TypeScript, JavaScript, PHP, Solidity, SQL, HTML, CSS
Frameworks: Laravel, Node.js, Express, Next.js, React, React Native, Expo, Tailwind, NativeWind
Blockchain: Smart Contracts, Tokens, Web3.js, Ether.js, HardHat, Remix, NFT Development, Dapp
Databases: MySQL, PostgreSQL, MongoDB, Firebase
Developer Tools: Git, GitHub, Docker, Postman, DigitalOcean, AWS, Hostinger, Vercel, Figma
Other: REST APIs, Authentication Systems, FinTech Integrations, UI and UX Design
